C:\Users\Administrator>

Active Directory Users and Computers

New Object - Group

Create in: contoso.com/Users

Group name:

Group name (pre-Windows 2000):

Group scope

☐ Domain local

☒ Global

☐ Universal

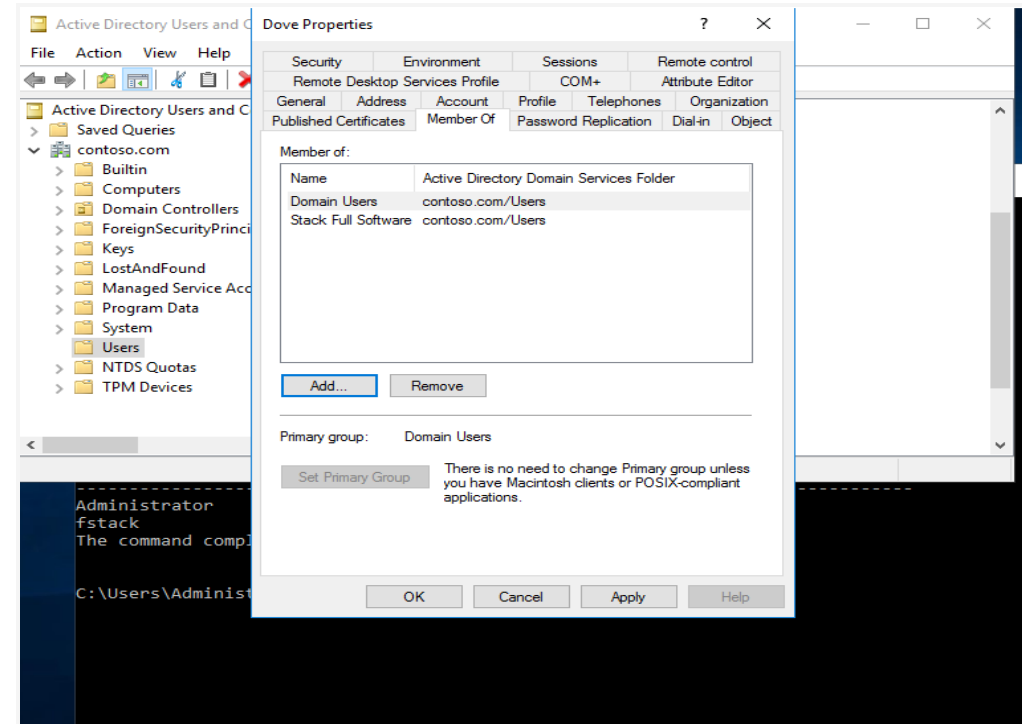

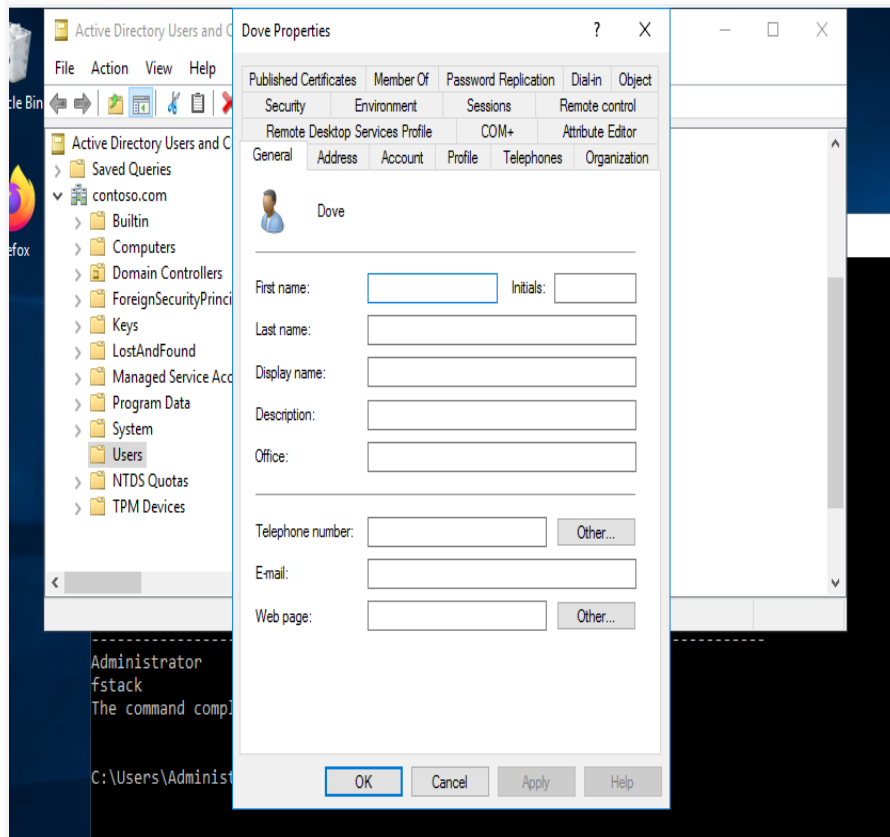

Group type

☒ Security

☐ Distribution

OK Cancel

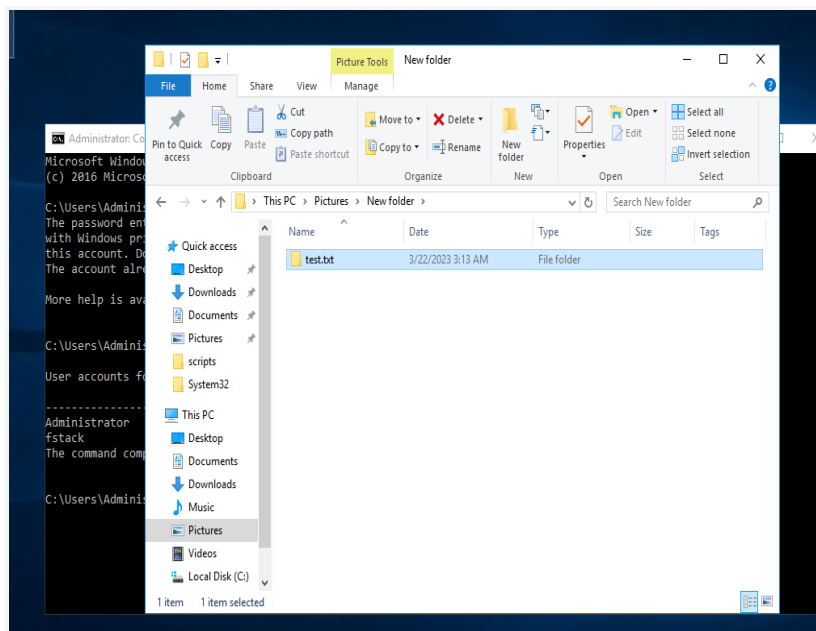

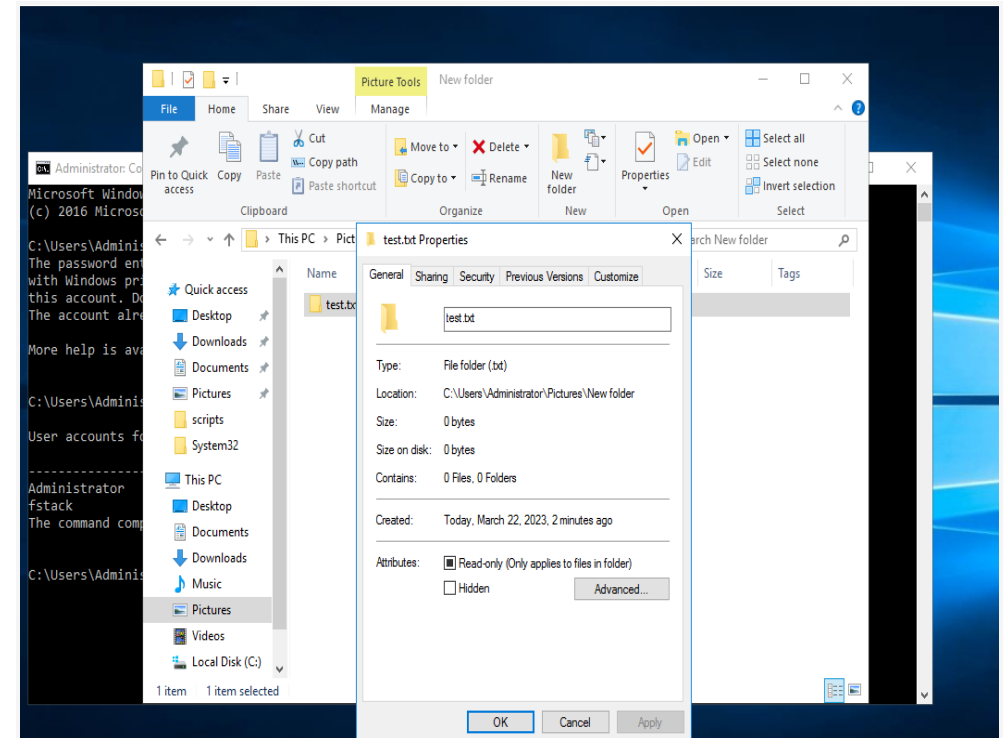

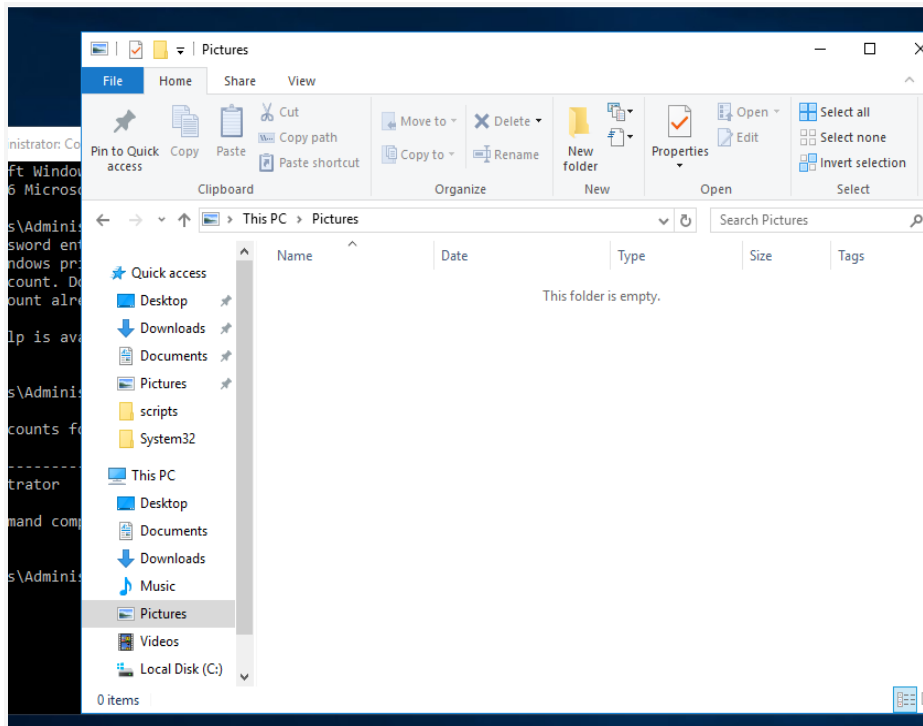

Administrator DefaultAccount Dove
fstack Guest krbtgt
The command completed successfully.

Step 3

Create a group with the department name and place the user in that group.

- Run dsa.msc tab to open active directory
- Active directory folder. Open folder that says create group
- Create group name StackFull Software
- Double click new users name to access new user properties to add user in designated group.
- Then added user into the assigned group

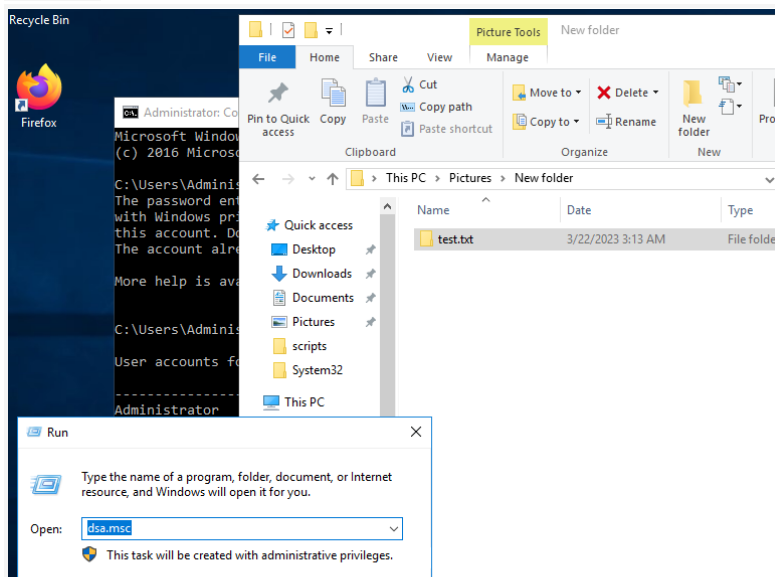

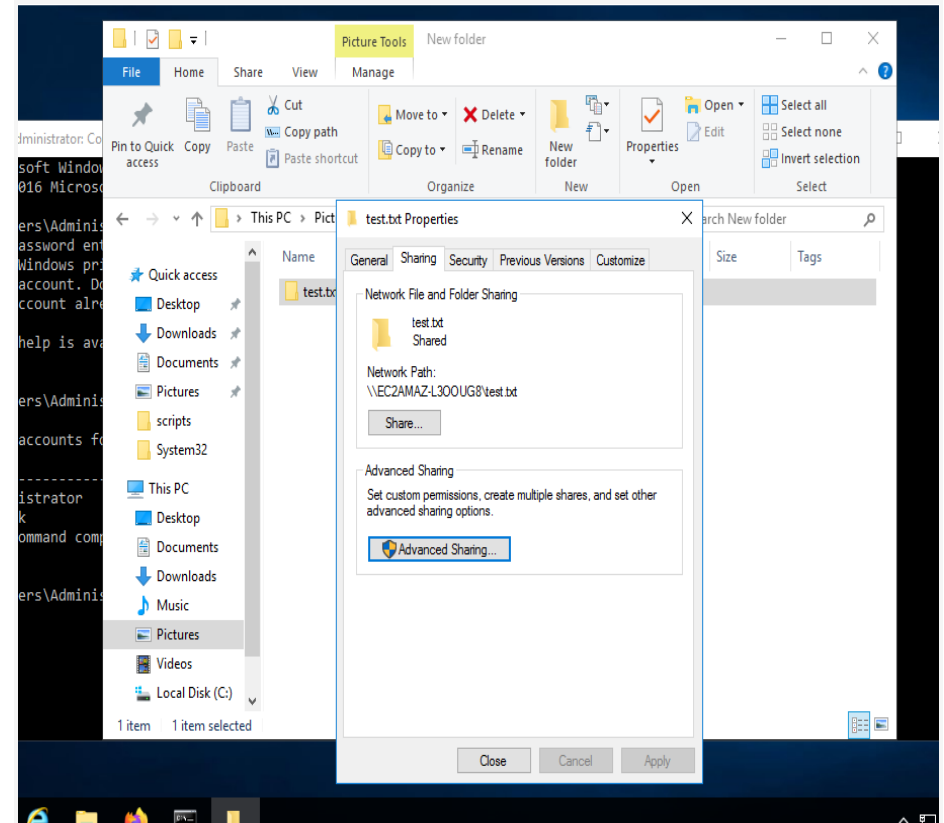

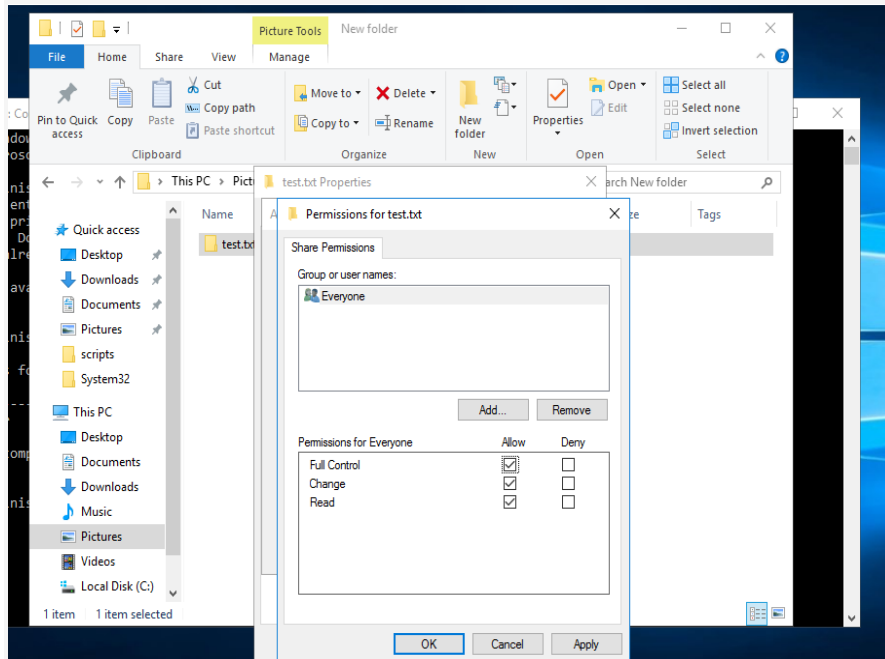

Step 4

Create a share on the server with the department name and share it only with people who belong to that department (read and write permissions). in the folder, create a text documental called **test.txt**.

- Created new folder called test.txt
- Open properties in shared folder

Continued...

- Making folder shareable to everyone
- Right click for everyone to access.
- Then hit apply
